

## 2015 VARIETY MARKET SHARE INFORMATION

The 2015 Seeded Acreage Report variety information compiled from MASC database as of August 12th is attached. Please note that due to insufficient crop acreage, crops with less than 500 acres were removed this year because of potential statistical disclosure concerns. For the following crops, a provincial summary of the percent relative acreage for each variety has been calculated:

Please note that this report is listing seed genetic origin and does not necessarily reflect certified seed sales (i.e. includes "bin-run" seed). Reseeded acres are "double counted" in this analysis.

When interpreting the data, please note that 0.0% implies that the variety was grown in Manitoba, but on less than 0.05% of that crop's acreage.
